Professor: Seymour Jones

Course Description:

The objective of the course is to impart a detailed understanding of forensic accounting with particular emphasis on the methodologies of financial statement fraud. The course is designed to demonstrate the various aspects of fraud, i.e., fraudulent financial reporting, identifying fraud schemes, including computer fraud and methods of concealment, as well as the analytical techniques in uncovering fraud and its prevention through effective internal control systems. The course also includes an analysis of the general techniques used in working in litigation support services. The course is of particular interest to the accounting profession, the world of finance and to business in general. The course content has also become of critical interest to regulators and lawmakers because of the notoriety of a series of recent financial scandals which have affected the entire business community.

The course will also review the new institutional structures that have been put in place recently by lawmakers and the accounting profession to deal with fraud and its prevention, i.e., the Sarbanes-Oxley Act and self-regulating measures adopted by the accounting profession.

Method of Instruction:

This course will use a variety of teaching methods including lectures, readings, case assignments and discussion, statement analysis and group projects.

Grading Policy:

Your course grade will reflect the following emphases:

- Class assignments and participation: 20%
- Mid-term examination: 40%
- Final examination: 40%
