**DOCTORAL STUDIES IN INFORMATION SYSTEMS AT NYU STERN**

**Mission:** To educate and train scholars who will produce first-rate research about information technologies in business and society and who will succeed as faculty members in first-rate universities.

**Faculty:** The faculty members of the department conduct research in a large number of exciting research areas in behavioral, technical, and economic aspects of Information Systems and have received numerous awards for their research contributions. Research interests of individual faculty are provided below and on the Web pages of the department.

**Students:** Our students are highly competitive within Stern and nationally. Recently our students have received school-wide awards as "outstanding doctoral students." They have won acceptance at doctoral consortia sponsored by the Academy of Management, the International Conference on Information Systems, and they have won national dissertation research competitions. In the past they have accepted faculty positions at such schools as The Wharton School at the University of Pennsylvania, Massachusetts Institute of Technology (MIT), University of California at Berkeley, University of Arizona, The University of Texas at Austin, University of Rochester, University of Maryland, Hong Kong Institute of Science & Technology, McGill University, and Boston University.

**Student Research and Interaction with the Faculty:** The heart of the IS doctoral program is immersion in a community of researchers. Every student has a formal research apprenticeship with one or more faculty members each year. Every student participates in formal and informal research seminars each week with departmental faculty and visitors. Every student presents research in progress and works toward producing publishable papers, usually with a faculty co-author. Students learn to be researchers by doing research. They learn to be research colleagues by working with others and critiquing their research.

**Location:** The department is located in the Washington Square campus in the heart of Greenwich Village in Manhattan, one of the most attractive locations in the country.

---

**STUDY WITH TOP INFORMATION SYSTEMS FACULTY AT NYU STERN**

- **Yannis Bakos, Ph.D.** (MIT), Associate Professor, Electronic Commerce, Pricing for Information Goods
- **Vasant Dhar, Ph.D.** (University of Pittsburgh), Professor, Data Mining, Predictive Modeling in Financial Markets
- **Anindya Ghose, Ph.D.** (Carnegie Mellon), Assistant Professor, Information Economics, Internet Markets, Pricing, Privacy and Security
- **Panagiotis Ipeirotis, Ph.D.** (Columbia University), Assistant Professor, Databases, Web Searching, Text & Web Mining, Data Cleaning
- **Bing Jing, Ph.D.** (University of Rochester), Assistant Professor, Product Differentiation, Imperfect Competition, Information Economics
- **Natalia Levina, Ph.D.** (MIT), Assistant Professor, IS Development, Cross-Boundary Collaboration, Outsourcing
- **Foster Provost, Ph.D.** (University of Pittsburgh), Associate Professor, Machine Learning, Data Mining, Activity Monitoring, Networked Data
- **Roy Radner, Ph.D.** (University of Chicago), Leonard N. Stern School Professor, Game Theory, Bounded Rationality, Pricing of Information Goods
- **Lee Sproull, Ph.D.** (Stanford University), Leonard N. Stern School Professor, Electronic Organizations/Communities, Social Implications of Computing
- **Arun Sundararajan, Ph.D.** (University of Rochester), Assistant Professor, Economics of IT, Pricing, Network Effects, Digital Piracy
- **Alexander Tuzhilin, Ph.D.** (NYU), Associate Professor, Personalization CRM, Data Mining, Temporal Databases
- **Norman White, Ph.D.** (NYU), Clinical Associate Professor, World Wide Web, Intranets, Collaborative Computing, Grid Computing

"The PhD program in Information Systems at Stern is one of the best doctoral programs in the field. We were exposed to a wide variety of research areas and methodologies and given complete freedom to define our research agendas. The placement record of the department bears testimony to the efforts made by the faculty to groom doctoral students into well-trained, productive researchers. As for New York City, there is no better place to experience graduate student life - from parks to pubs to people."

Ravi Aron and Balaji Padmanabhan, Stern Alumni, 1999
Assistant Professors at The Wharton School, University of Pennsylvania
