

DRAFT: SUBJECT TO CHANGE

NYU

**LEONARD N. STERN
SCHOOL OF BUSINESS**

FINC-GB.3365.30 Private Equity Finance

Spring 2015

Meets: Wednesdays 6-9 PM.

Room: T-201

Instructor Information:

Gustavo Schwed

<http://w4.stern.nyu.edu/faculty/bio/gustavo-schwed>

gschwed@stern.nyu.edu

Office Hours: By appointment

Office: KMC 9-51

Email me if you wish to make an appointment.

Prerequisites:

Foundations of Finance (COR1-GB.2311)

Corporate Finance (FINC-GB.2302)

Visiting students must have taken comparable prerequisite courses at their home institutions.

Prerequisites must have been completed prior to taking this course.

This is a rigorous course with a heavy workload. It requires substantial financial modeling and analysis. While it is not a prerequisite, students without a strong background in finance may find it helpful to take Modeling Financial Statements (ACCT-GB.3304) prior to taking this course.

Course Summary

This course will use the case method to provide a comprehensive overview of private equity finance. The objective of this course is to survey the private equity industry and to provide students with an understanding of the origination, valuation, execution, monitoring, and realization of private equity transactions and of the process of investing in private equity funds. The course will include a series of lectures designed to teach specific skills and concepts used in the practice of private equity and case discussions through which those skills and concepts will be illustrated and utilized.

Private equity, including venture capital, growth investing, distress, and leveraged buy-outs, has grown from less than \$5 billion in assets under management in 1980 to over \$1 trillion today and is therefore a field worthy of study. Its emergence as a significant global asset class has elevated the industry in the public consciousness and led to a debate about its effect on portfolio companies, contribution to systemic risk, and compensation and taxation practices. The dramatic growth of assets under management by private equity firms has also led to a compression in investment returns, making the tasks of executing successful private equity transactions and selecting private equity funds increasingly challenging.

The course will be divided in two parts. The first section will examine the industry from the perspective of the private equity firms who invest in and manage portfolio companies (referred to as the general partners or "GP"s). While this section will address all significant segments of the GP

universe, including venture capital, growth investing, distressed investing and leveraged buy-outs, the main focus will be on the LBO industry. In this section, we will discuss the techniques used by private equity firms to originate, diligence, value and execute transactions as well as how these PE firms seek to add value to their portfolio companies and eventually exit these investments. Through the cases, we will analyze several private equity transactions and situations through which we will apply these concepts and techniques.

The best way to understand how a leveraged buyout works is to construct an LBO model. The first section of the course will include a lecture on LBO modelling as well as several assignments through which students will learn how to build an LBO model step by step.

The second section of the course will examine the private equity industry from the perspective of the institutions that invest in private equity funds (the limited partners or "LP"s and their consultants or "gatekeepers"). We will survey the LP universe (pension funds, endowments, fund-of-funds, sovereign wealth funds, and secondary funds). We will analyze the investment track records of GPs, identify the factors that lead to strong performance, and review the process for PE fund raising, due diligence and selection. We will also discuss the terms of fund agreements and the current state of LP/GP relationships.

Instructor Policies

Attendance/Lateness

This course will rely and be heavily graded on active, high quality class participation. Therefore, on-time attendance is required for every class except in cases of excused absences: documented serious illness, family emergency, religious observance, or civic obligation. Recruiting activities and business travel are not acceptable reasons for class absences. Please notify me of any absence prior to the start of the class. Unexcused absence and/or tardiness will hurt your grade, potentially materially.

Assignments

Unless otherwise noted, all assignments must be submitted prior to the beginning of the class in which they are discussed. Late submissions will not be accepted and will be assigned a failing grade. Please submit all assignments through NYU Classes.

Use of Electronic Devices

Please do not use smart phones, laptops or other electronic devices during class. I understand many of you like to follow the lecture and take notes on your laptop. As an alternative, I suggest you print out the presentation for each lecture (which is or will be posted in NYU Classes under the tab for its specific date) and bring it with you to class.

Honor Code

All students must adhere to the Stern Code of Conduct: <http://www.stern.nyu.edu/uc/codeofconduct>

Students with Disabilities

Students who require academic accommodation during the course should provide me with a letter from the Moses Center for Students with Disabilities (<http://www.nyu.edu/csd>) outlining the accommodations they recommend.

Class Process

This class will primarily utilize the case method to cover the material. The process for reviewing cases will work as follows:

I will divide the class into groups of three or four depending on class size. I will place students with relevant experience (such as private equity, leveraged finance, M&A, financial sponsors' coverage, and private equity transaction support consulting) into different groups to insure that the groups are equitably balanced. I will reshuffle the groups once during the course.

While each student is required to prepare for every case discussion, there will be group case analysis submissions due for only six cases (excluding the Duke's LBO case – see below). The case analyses should not exceed 2-3 of double spaced typed pages (in a reasonable font size) plus any analyses or exhibits you chose to include (see further below for case analysis directions) and should be submitted via NYU Classes prior to the beginning of the relevant class. It is up to the group members to decide how the work on each case is divided. In the event a member of a group is consistently not pulling his/her weight, the other members of the group should try to persuade this student to contribute more fully. Failing that, the group should notify me and I will take corrective action. Keep in mind that all members of a group will receive the same grade for each written case analysis. For the avoidance of doubt, groups should not consult or share work with each other when preparing these analyses.

I will release questions/suggested topics for each group case analysis assignment well in advance of the due date. I will also post topics and questions for the cases for which no written assignment is due, which should help you prepare for the case discussions in class.

At the beginning of each case discussion, I will cold call on an individual student to present his/her group or individual analysis, depending on the case. I will continue to cold call students throughout the case discussions and will also call on volunteers. To insure that students are prepared for every case discussion, I will especially rely on cold calling for cases for which no group assignment is due. While I expect a robust discussion in which students feel free to disagree with each other (and with me) I would like that case discussions to be conducted with utmost civility and respect.

In addition to the six group case analyses, there will be three individual assignments due throughout the course, each relating to the construction of a different section of the same LBO model (the Duke's LBO case): a) operating assumptions and projections, b) sources and uses of funds, capital structure and debt schedules, credit statistics and opening balance sheet adjustments, and c) valuation, IRR and DCF analysis.

In some classes, I will lecture on a particular topic (such as LBO modeling, due diligence, valuation techniques, portfolio company exit, etc.) and we will not review a case. While there will be less time for discussion during these lectures, I expect students to remain alert, engaged, and prepared to be cold called.

In several classes we will have guest who will either lecture on a particular topic or lead a case discussion. These guest lecturers are private equity industry leaders. I am keen that this be a great experience for both you and them. Therefore I will be especially focused on assessing class engagement during these guest lectures.

Class participation is an important element of your grade. I will grade participation based on the quality of contributions and insights. Quality comments 1) contribute to moving the discussion forward, 2) offer a unique and relevant perspective on the issue, 3) build on the comments of others, and 4) show evidence of analysis of inherent trade-offs. The class participation grade will also consider the asking of relevant questions, attendance/tardiness, posting of questions and relevant materials in the class Forum, and other evidence of active engagement.

At the end of the course, you will be handed a case to prepare on your own (with no consultation with any other individual), which will serve as a take-home final exam. Instructions for the take home exam will be released closer to the end of the course.

Case Analysis Directions

When preparing the case analyses, you should avoid rehashing facts from the case. Instead, you should focus on delivering conclusions and recommendations, showing the analysis that supports such conclusion and reflecting on the trade-offs and risks inherent in your conclusions or recommendations. These analyses should be written as if the audience were a decision maker at a private equity firm. They can be written in prose or in presentation style. They should be written, organized, and formatted according to professional standards.

Use of "Forum" section of NYU Classes Site

I will set up a Forum thread for each assignment where students should post any questions or comments and where I will address questions on the assignments. This will insure that all students benefit from the Q & A related to that assignment. Students are welcome to answer questions posted on Forum. Comments, questions and answers that are particularly helpful and illuminating will count towards your class participation grade.

Grading

Class Participation:	25%
Written Group Case Analyses	30%
LBO modelling individual assignments:	25% (split 40/40/20 Part 1, 2, and 3)
Final Exam:	20%

Grade distribution will roughly follow the Stern finance department grading curve for non-introductory courses which limits the number of A/A- to 35% of the class. Since I will be teaching two sections of the course, students from both sections will be pooled together when calculating the curve.

Course Materials

The course pack is available through XanEdu for purchase in the bookstore or on-line. To search for the course pack in the NYU bookstore website: bookstores.nyu.edu, use ISBN number 978200008410B.

Most, but not all of the cases and reading materials are also available for purchase and down-load through the following link to the HBSP site:

<https://cb.hbsp.harvard.edu/cbmp/access/34389748>

The few cases and articles that are not available through the above will be posted to the Resources section of the NYU Classes course site.

The course outline below shows which topics will be covered during the first half (H1) and the second half (H2) of each class as well as which readings and deliverables are due.

Course Outline

<u>Class #</u>	<u>Date</u>	<u>Topics</u>	<u>Cases</u>	<u>Deliverables</u>	<u>Readings</u>
1	2/11	H1) Overview of Private Equity lecture H2) The Private Equity Firm, and Deal Origination: Carlyle cases.	Eccles & Knoop, "The Carlyle Group" Godes, Egawa & Yamazaki, "Carlyle Japan (A), (B), and (C)".		Lerner, "A Note on Private Equity Partnership Agreements".
2	2/18	Private Equity Deal Due Diligence: H1 lecture and H2 Summit/FleetCor Case (A).	Roberts, "Summit Partners -- The FleetCor Investment (A)".		
3	2/25	H1) Deal Due Diligence: Summit/FleetCor case (B) and (C) H2) LBO Modeling lecture	Roberts, "Summit Partners--The FleetCor Investment (B) and (C)".	Case Analysis 1	Rosenbaum & Pearl, "Investment Banking: Valuation, Leveraged Buyouts, Mergers & Acquisitions", Chapter 5.
4	3/4	H1) Venture Capital Diligence and Terms: Iron Gate Case	Kaplan, Glickman & Terachi, "Iron Gate Technologies". (BS)		Hardymon & Lerner, "A Note on Private Equity Securities" Roberts & Stevenson, "Deal Structure and Deal Terms". Gompers, Ivashina & Van Goul, "Note on LBO Capital Structure".

		H2) LBO Capital Structure lecture			
	3/5		No Class	Duke's LBO Model Part 1	
5	3/11	Valuation in LBOs: H1 lecture and H2 Visma case	Gompers, Misztal & Van Gool, "Hg Capital and the Visma Transaction". Cases A, B-1 and B-2.		Kaplan, "A Note on Discounted Cash Flow Valuation Methods" Hellmann, "A Note on Valuation of Venture Capital Deals"
	3/18		No Class	Duke's LBO Model Part 2	
6	3/25	H1) Valuation & Execution: Dell LBO case H2) Discussion of Duke's Model.	Collis, Yoffie & Shaffer, "Taking Dell Private".		
	3/30		No Class	Duke's LBO Model Part 3	
7	4/1	H1 and H2) Value Creation in Portfolio Companies: TDC buy-out	Lerner, "Private Equity Transforming TDC"	Case Analysis 2	
	4/8	H1) Distressed Investing: Loan to Own: Countrywide case	Gilson & Abbott, "Countrywide plc"	Case Analysis 3	Lerner, Leamon & Vase, "A Note on Private Equity in Developing Countries" Gompers, Ivashina & Dore, "Private Equity Valuation in Emerging Markets"

8		H2) Private Equity in Emerging Markets: Silver Lake case	Musacchio & Goldstein, "Silver Lake and Private Equity in Brazil: Carnaval or Calamity?"		
9	4/15	H1) Value Creation in Portfolio Companies lecture H2) Exiting PE Investments lecture	No Case, Lecture (JH)		Rogers, Holland & Haas, "Value Acceleration: Lessons from Private- Equity Masters". Fruhan, "Company Sale Process" Lerner, "Note on the Initial Public Offering Process".
10	4/22	H1) Exiting PE Investments: Xerium Case H2) Private Equity Fund Selection lecture	Hardymon, Lerner & Leamon, "Apax Partners and Xerium S.A."	Case Analysis 4	Hardymon, Lerner & Leamon, "Between a Rock and a Hard Place: Valuation Distribution in Private Equity".
11	4/29	H1) Investing in PE Funds: CPPIB Case H2) PE Fundraising lecture	Lerner, Rhodes-Kropf, Burbank, "The Canadian Pension Plan Investment Board: October 2012".	Case Analysis 5	Lerner, Hardymon, and Leamon, "A Note on the Private Equity Fund Raising Process".

12	5/6	H1) The Private Equity Firm as a Public Company: Blackstone case H2) Course Review lecture	Hardymon, Lerner, Leamon, "The Blackstone Group's IPO".	Case Analysis 6
