Digital Currency, Blockchains, and the Future of the Financial Services Industry

Profs. Geoffrey Miller, Max Raskin, and David Yermack
NYU Law School LAW-LW.12371
NYU Stern School FINC-GB.3324

KMC 1-70, 44 West 4th Street
Mondays & Wednesdays, 12:30 – 1:50
Spring 2021

Course overview
Bloomberg in 2016 summarized a research report issued by McKinsey & Co:

Firing people won’t be enough to save the world’s biggest banks from technological and regulatory changes that have reshaped the industry - whole businesses must go, according to McKinsey & Co. Almost every bank will have to quash aspirations to be all things to all customers . . . Only three to five global full-service banks will survive, McKinsey said.

In 2020, Goldman Sachs appointed a new Head of Digital Assets, who told CNBC in an interview that:

In the next five to 10 years, you could see a financial system where all assets and liabilities are native to a blockchain, with all transactions natively happening on-chain.

This course covers digital currencies, blockchains, and related topics in the FinTech area, perhaps the most significant innovation in the financial world since the advent of double-entry bookkeeping centuries ago. The technology appears to represent an existential challenge for major parts of the finance industry. It is now commonly suggested by experts such as McKinsey that commercial banks and stock exchanges may no longer exist, or may become much smaller, within the next 10 to 20 years, with increasing volumes of payments and exchange taking place on a peer to peer basis.

We will begin with a study of the nature of money and legacy payment and banking systems. We will then study the emergence of stateless, cloud-based digital currency systems since 2009. Further lectures will explore threats that blockchain technology poses to incumbent firms and their resulting attempts to co-opt the technology into existing business models. We survey related issues including hacking, “smart contracts,” governance, and emerging regulation.

Learning Outcomes: The goal of this course is to equip the students to better understand the law and business of blockchain technology, both in its initial application in the digital currency Bitcoin, as well as in the applications currently being explored for a wide
variety of uses and functions. The course is also intended to create a bridge between law
students and business students that will enhance the quality of their communications after
they enter into their careers.

Course organization
The course meets twice a week for lectures, Mondays and Wednesdays from 12:30–1:50.
All classes will be held remotely on Zoom. The course will feature a number of guest
speakers from industry and government.

The Stern School and Law School have somewhat different class schedules during the
Spring 2021 semester. Our first class meeting will be Monday, February 1 (even though
the Law calendar begins January 20), and our final class meeting will be Monday, April
26 (even though Stern’s calendar continues to May 10). In between, we will hold class
on any Monday or Wednesday on which either school would have been scheduled to hold
class. This includes one Tuesday (February 16) and one Thursday (March 25) which will
be treated as Legislative Mondays at the Law School. There will be 26 class meetings,
the same as in a normal semester.

All class meetings will be recorded for later viewing. Links to recordings will be
available on the NYU Classes website.

Readings
Many readings for the course will be posted in .pdf or .ppt format on NYU Classes, or
will be available through Internet links included in the syllabus below. The syllabus may
be updated several times during the semester to reflect the availability of new readings or
guest speakers.

We will also use three textbooks:

  Excerpts will be distributed to students via NYU Classes.

- Burniske and Tatar, Cryptoassets: The Innovative Investor’s Guide to Bitcoin and
  Beyond (2018). This book is available for purchase at the NYU campus
  bookstore and from other retail sources.

- Narayanan et al., Bitcoin and Cryptocurrency Technologies (2016). This book, a
  companion to Princeton University’s Coursera open on-line course in digital
  currency, is available for purchase, but a full pre-publication draft can be
downloaded at no cost.

Note that due to the fast-changing nature of the subject matter, material in all of these
books may already appear to be out of date.

Students are encouraged to stay current on the topic by following recent developments.
For daily breaking FinTech news, the authoritative source is the website CoinDesk.
A succinct, non-technical and highly readable introduction to the field is Malekan, *The Story of the Blockchain* (2018).

**Evaluation**
Evaluation will be based 90% on student papers or projects that will be due during the May exam period, and 10% on the “student participation” short writing assignments described below.

**Student Participation**
Each student shall turn in a 1 to 2-page essay analyzing or discussing a topic that was discussed in class or addressed in the assigned readings during the prior month. The essay shall explore an issue or question that remains unsolved, or inadequately explored or resolved, and explain why that issue is important or impactful. The essay will be written in 12 point font, with citations as necessary to the lecture or class assigned reading and any other sources. All essays will be submitted by 5:00pm Eastern time on the below dates via NYU Classes in .docx or .pdf format. These essays will be graded on a pass/fail basis and will account for 10% of the student grade. *Essay due dates:*
February 26, March 26, and April 23.

**Lecture topics**
An approximate list of the course’s lecture topics appears below. We may deviate from this schedule based upon factors including the pace of individual lectures and the availability of guest speakers. Additional readings may be supplied by guest speakers and posted on NYU Classes when they become available.

**Monday, February 1**
GM/MR/DY
Introductory class

**Wednesday, February 3**
GM
Payment systems

- Narayanan et al, Preface pp 3-22.
- Carnell, Macey & Miller (50-56; 65-78)

**Monday, February 8**
GM
The nature of money

- Carnell, Macey & Miller (19-21; 31-40; 199-204)
Wednesday, February 10    GM    Bank created money

- Carnell, Macey & Miller (238-249; 260-267)

Tuesday, February 16    DY    The road to Bitcoin

- Burniske & Tatar, Ch. 1-3.
- Segal, 2014, “Eagle Scout, Idealist, Drug Trafficker?”

Optional: For a possible narrative of the mysterious circumstances surrounding the creation of Bitcoin, visit [http://vu.hn/bitcoin%20origins.html](http://vu.hn/bitcoin%20origins.html) and see the discussion at [https://blocksplain.com/2018/02/15/satoshi-nakamoto-scronty/](https://blocksplain.com/2018/02/15/satoshi-nakamoto-scronty/)

Wednesday, February 17    DY    Blockchains and mining

Monday, February 22

- Burniske & Tatar, Ch. 13.

Wednesday, February 24    DY    Mining, forks, and code=law

- Narayanan, et al. Ch. 5.
- Burniske & Tatar, Ch. 14.

Monday, March 1    [MR]    Cryptocurrency as a commodity

*Guest speaker:* Heath Tarbert, former U.S. CFTC Chairman

Wednesday, March 3    [GM]    Electronic cash, decentralized exchange, and the Constitution

*Guest speaker:* Peter van Valkenburgh, Coin Center

Monday, March 8    GM/DY    Stablecoins

Wednesday, March 10    GM/DY    & Central bank digital currency
• Carnell, Macey & Miller (204-238)
• Brunnermeier, James, and Landau, 2019, “The Digitalization of Money.”
• www.digitaldollarproject.org
• European Central Bank, Report on a Digital Euro, 2020

Monday, March 15 [DY] 
Blockchain forensics
Guest speaker: Jonathan Levin, Chainalysis

Wednesday, March 17 DY 
Alternative consensus protocols; altcoins
• Narayanan et al, Ch. 4.

Monday, March 22 MR 
Criminal litigation
• U.S. v. Ulbricht, 31 F. Supp. 3d 540 (S.D.N.Y. 2014) (Forrest, J.)

Wednesday, March 24 MR 
Securities regulation and blockchains
• Van Valkenburgh, 2018, “Framework for Securities Regulation of Cryptocurrencies.”
• Raskin, 2019, “A Regulatory Classification of Digital Assets: Toward an Operational Howey Test for Cryptocurrencies, ICOs, and Other Digital Assets.”
• SEC v. Ripple Labs, case no. 20 Civ. 10832 (S.D.N.Y., Dec. 22, 2020)
• Garlinghouse, 2020, “The SEC’s Attack on Crypto in the United States.”

Thursday, March 25 [MR] 
Securities regulation and blockchains
Guest speaker: Jorge Tenreiro, U.S. Securities & Exchange Commission

Monday, March 29 MR 
Smart contracts
• Burniske & Tatar, Ch. 4 & 16
• Narayanan et al., Ch. 9.

**Wednesday, March 31**  [DY]  DeFi  
*Guest speaker:*  Jake Chervinsky, General Counsel, Compound

**Monday, April 5**  [MR]  Jurisdictional issues in civil litigation

**Wednesday, April 7**  [DY]  Cryptocurrency investing

**Monday, April 12**  [DY]  Cryptocurrency investing  
*Guest speaker:*  Barry Silbert, Digital Currency Group

**Wednesday, April 14**  [DY]  Cryptocurrency derivative markets  
*Guest speaker:*  Thomas Pacchia, HODL Capital

**Monday, April 19**  [DY]  Blockchains and intellectual property  
*Guest speaker:*  Amy Whitaker, NYU Steinhardt

- Whitaker, 2019, “Art and Blockchain,” *Artivate.*

**Wednesday, April 21**  [DY]  Blockchains and the capital markets

- Yermack, 2017, “Corporate Governance and Blockchains,”

**Monday, April 26**  [MR]  Final class  
*Guest speaker:*  Erik Voorhees, crypto pioneer; founder of SatoshiDice and ShapeShift
